

IDIBELL Proteomics specialist

A position is opened for a proteomics specialist in the Proteomics Facility at IDIBELL to cover a maternity leave, starting in mid November 2015 until June 2016. The laboratory is focus in mass spectrometry based protein identification, quantitation and posttranslational modifications.

The main duties of the candidate will be: sample preparation (digestions, purification, fractionation), sample processing, data analysis, equipment maintenance (HPLC and mass spectrometers ion trap and MALDI) and some administrative tasks.

We are seeking a highly motivated person with experience in mass spectrometry, HPLC, MS data analysis and proteomics applications in biomedical research. Organization and good communication skills and capacity to work independently and in a team will also be desired. A degree in life sciences (biochemistry, chemistry, biology, etc...) is desired, however other qualifications will be considered depending on experience.

Applications must include a presentation letter and CV including two potential references to sbarcelo@idibell.cat. Closing date for applications is 31st October 2015.
