

FibroStatin SL (<http://fibrostatin.com/index.php/en/>), a biotech company focused on the development of diagnostic and therapeutic products based on advances in GPBP (Good Pasture Binding Protein) technology, was founded in 2005 and has its headquarters in the Parc Científic of the University of Valencia.

Our R&D facilities include mass spectrometry-based proteomics technology to identify, characterize and quantify GPBP-targeted proteins and pathways.

Job description (immediate incorporation):

Laboratory Technician with proven expertise in mass spectrometry instrumentation

The position offers the opportunity to:

- Join an enthusiastic, highly motivated team within an important R&D project.
- Develop and support proteomics projects.
- Use of own research facilities (ABI 5600+).
- Work in a nice working atmosphere.
